PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable web applications using **React, .NET, and Blazor**. Skilled in component-based architecture, state management (**Redux, Hooks**), and RESTful API integration. Experienced with enterprise-level platforms like **Microsoft Dynamics 365**, delivering high-quality features with zero critical defects. Strong problem-solving skills with a solid foundation in data structures and algorithms.

EDUCATION

KIET Group Of Institutions(Dr. APJ Abdul Kalam Technical University)

Aug. 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering, 8.4 SGPA

Ghaziabad, India

SKILLS

Languages : C#, HTML, CSS, JavaScript, C++, XML, SQL

Frameworks/Libraries : React, Redux, React Hooks, React Router, .Net Core, Blazor, jQuery, Telerik

Tools/Platforms : Figma, Azure, Git and GitHub, Visual Studio Code, Visual Studio, Postman, SSMS

EXPERIENCE

HCLTech

March. 2024 – Present

Graduate Engineer Trainee

Noida, India

• Microsoft COI-Nexus:

- * Developed a scalable enterprise web application with **component-based architecture**, enabling dynamic, data-driven workflows and dashboards for enterprise users.
- * Engineered high-performance **data grids** with **server-side paging, sorting, and filtering**, enabling efficient handling of **large datasets (5K+ records)** and improving application scalability.
- * Designed and implemented **advanced dynamic filtering capabilities**, supporting **multi-condition logic (AND/OR)** across related and inverse-related entities.
- * Integrated with **Microsoft Dynamics CRM (v9.2 API)** using **FetchXML and OData queries**, including entity expansion and custom data mapping.
- * Architected a **reusable component library** to standardize UI patterns across the application, reducing development effort and ensuring design consistency.

• Carpooling Application:

- * Developed a **full-stack** car pooling platform using **React, ASP.NET and SQL**, enabling users to book and manage rides efficiently.
- * Utilized **React Hooks** (useState, useEffect) for local component state and side-effect management across the application.
- * Managed global application state using **classic Redux**, implementing actions, reducers, and store architecture for predictable state updates across components.
- * Implemented **client-side routing** using **React Router** to enable seamless navigation across booking, wallet, and profile screens.
- * Implemented secure **JWT-based authentication** and **role-based authorization**, supporting multiple user roles and access levels.
- * Consumed **RESTful APIs using Axios**, ensuring efficient and error-safe asynchronous client-server communication.

Nextech Solutions India Pvt Ltd

October. 2023 – March. 2024

JavaScript Intern

Remote

- **E-commerce builder:** Consumed API's using ASP.NET framework and worked on front-end using HTML, CSS, JavaScript, jQuery, also used several libraries like bootstrap, datatables etc

- **Alert System & Chat Dashboard:**

- * Built a dashboard using **React, Spring Boot, and MongoDB** to extract and display alerts from email and issues from GitHub repositories.
- * Utilized **React Hooks** and **Redux** for local and global state management, ensuring consistent data flow across dashboard components.
- * Developed a real-time chat feature using **Node.js** and **WebSockets**, integrating with the **Slack API** to bridge customer-facing chat with internal support workflows.

Certifications

- **AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents**, Udemy
- **Azure AI Fundamentals(AI-900)**, Microsoft
- **Programming for Everybody (Getting Started with Python)**, University Of Michigan
- **Python Data Structure**, University Of Michigan
- **React - The Complete guide**, Udemy
- **Complete ASP.NET Core 6 .Net6**, Udemy

PROJECTS

Yoga AI

- Implemented real-time pose detection using PoseNet with 85% accuracy
- Processed live webcam input for posture correction
- **Tech Stack:** HTML, CSS, JavaScript, React, CNN, PoseNet, TensorFlow, Python, Numpy, Pandas

Price Comparison Tool

- Built web scraping pipelines to fetch product data from multiple platforms
- Optimized search results to reduce comparison time by 50%
- **Tech Stack:** HTML5, CSS3, Bootstrap, Django, Web Scraping
